Screenshots — containerd & Container Runtimes (CRI, OCI)

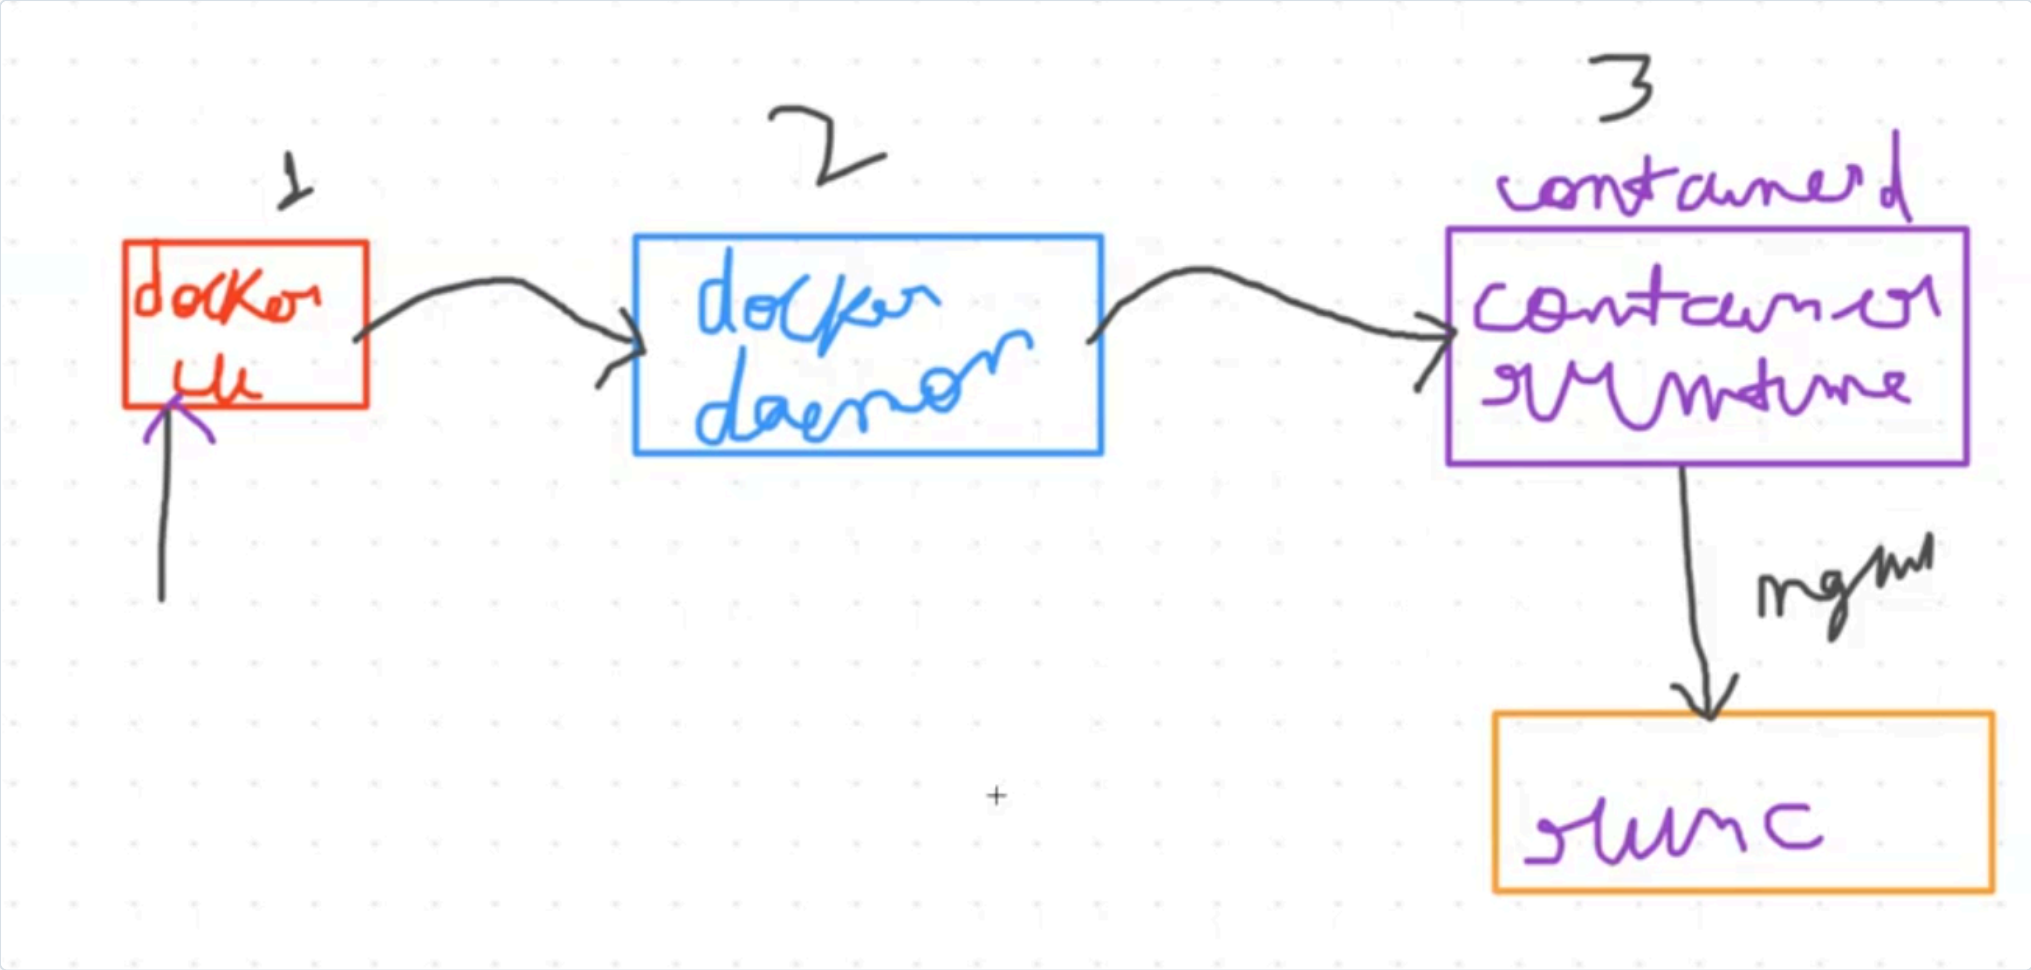

Kubernetes Lecture 11 · 7 shots, chronological · source stills from the session (2026-10-07 22:41 – 23:21)

 Whiteboard — `docker run nginx`: docker CLI → docker daemon → containerd (image pull, set network/storage, container manage) → runc → process

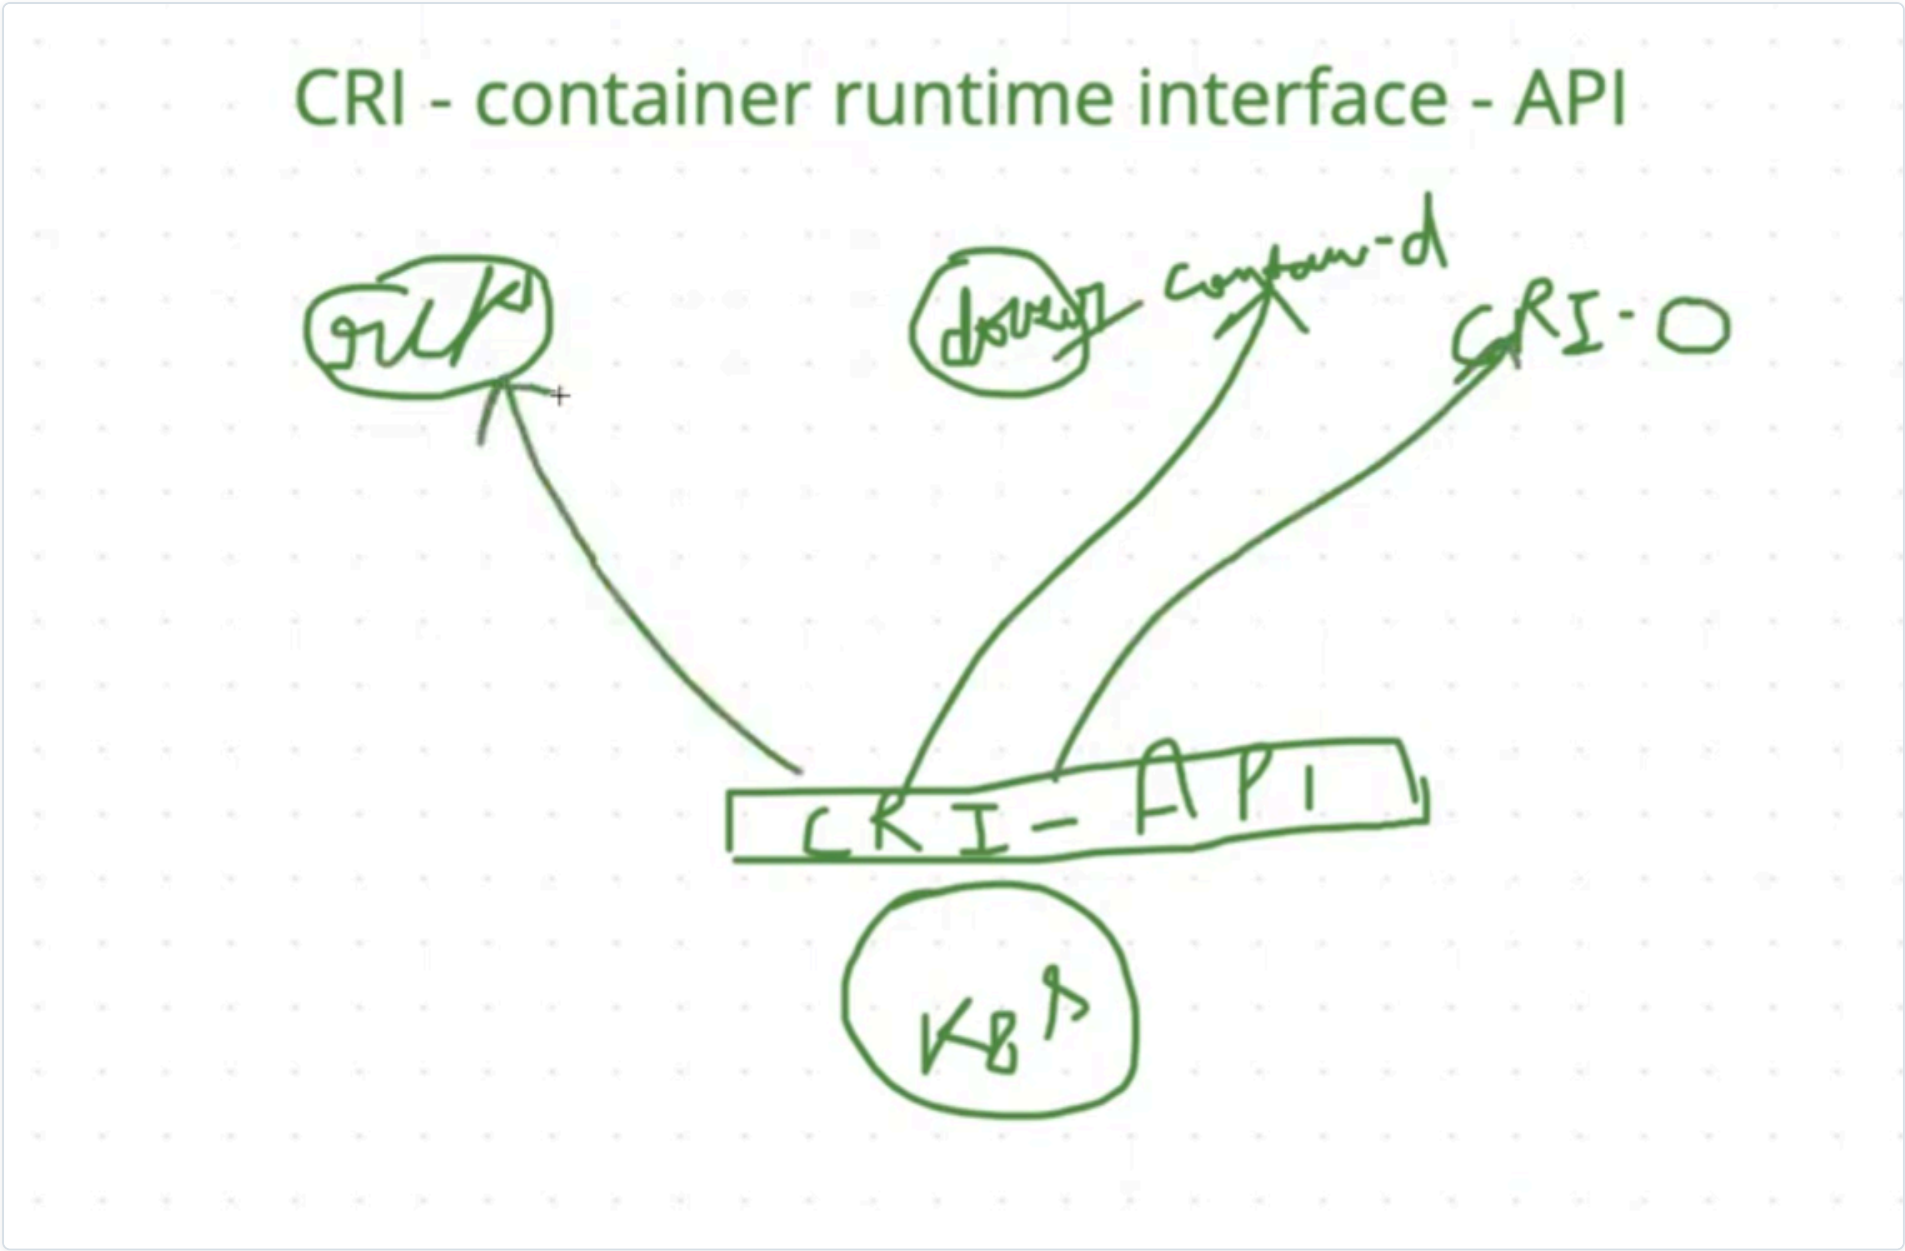

1
2
3
containerd
4
runc

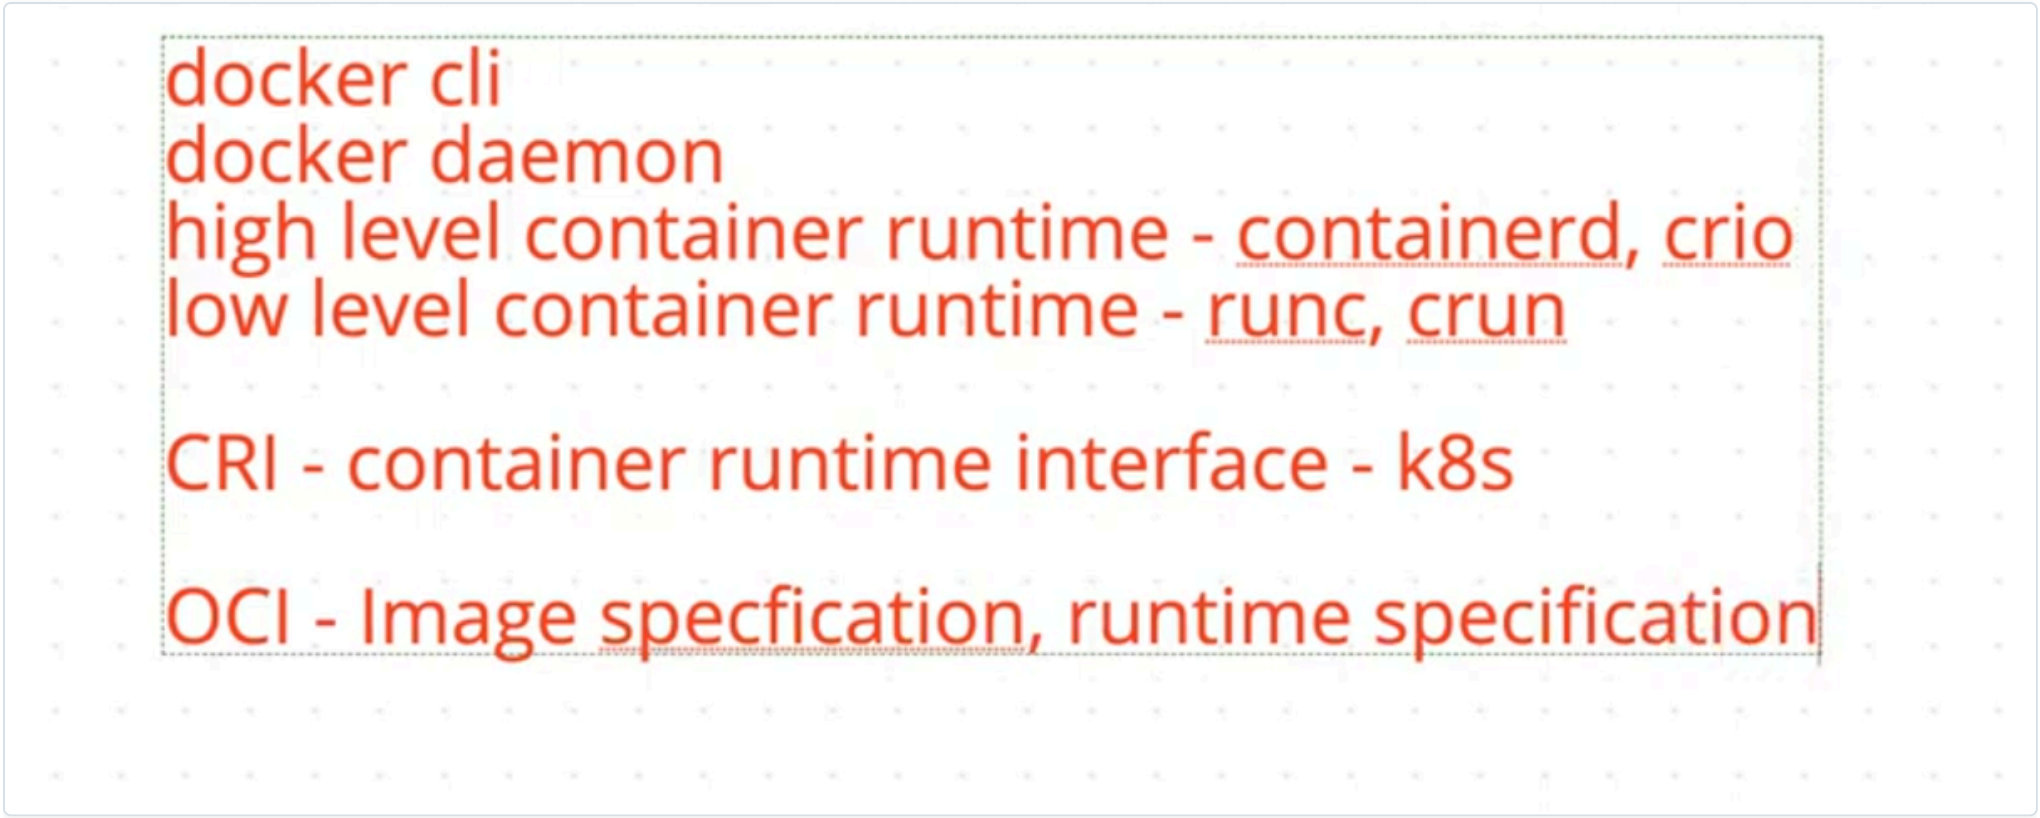

Same flow — containerd hands the nginx image to runc
